

ST. LUKE'S CANCER CENTER

Excellent cancer care.
for life.

To schedule a new patient appointment, please call 484-503-HOPE (4673).

St. Luke's Breast Cancer Program

Breast cancer care is no longer simple; it requires a team of experts. At St. Luke's, we have developed a personalized team approach to breast cancer care to successfully diagnose and treat the disease and provide essential support every step of the way.

The Team Approach to Breast Cancer Care Makes a Difference

From the very start of a breast cancer journey, St. Luke's multidisciplinary network of exceptional breast cancer specialists including doctors, nurses, breast health specialists, cancer counselors and support staff are there every step of the way to offer support, foster hope and provide the best treatment options available.

This team works together to help ensure breast cancer patients have the best chance of becoming breast cancer survivors – and thrivers.

St. Luke's Breast Cancer Team includes:

- Surgical Oncologists
- Medical Oncologists
- Radiation Oncologists
- Radiologists
- Pathologists
- Reconstructive Surgeons
- Oncology Nurses and Oncology Nurse Practitioners
- Genetic Counselor
- Dietitians
- Physical Rehabilitation and Exercise Specialists
- Financial and Health Insurance Counselors
- Social Services Coordinators

Specialization Makes a Difference

In every field of medicine, specialization makes a difference – cancer surgery is no exception. Studies have shown that finding the best-trained, educated and experienced surgeon to perform breast cancer surgery can significantly improve care and survival. Surgical oncologists have completed specialized fellowships and participate in societies dedicated to cancer and breast surgery.
